The following is an Examiner's Statement of Reasons for Allowance: The Prior Art of Record is drawn to immobilization devices utilizing electrodes and teaching the use of test circuits therewith. However, the Prior Art of Record does not disclose nor make obvious the claimed combinations found within the Independent Claims 1, 5, 8 and 9. These Independent Claims are drawn to immobilization devices and/or immobilization methods. Claim 1 requires the use of a first, second and third electrode wherein a test signal is provided via the first and second electrodes so as to prompt the movement of the target toward the third electrode for immobilization via the third electrode. Claim 5 is similar to that of Claim 1, but offers a method wherein a signal is provided via the first and second electrodes which are in contact with the target and providing the third electrode to come into contact with the target as a consequence of movement of the target in response to the first signal and then providing an immobilization signal via the third electrode. Claim 8 is drawn to a method for selecting a subset of electrodes from a plurality of electrodes and wherein the subset is used for immobilizing a target. Claim 9 is drawn to an immobilization device wherein a circuit selectively couples each of a multiplicity of subsets of electrodes of a plurality of electrodes to a signal source for delivery of the immobilization signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
